

The Role

We are seeking a highly motivated and skilled 5-axis CNC Programmer and Machinist to produce prototypes, fixtures, die/mold components, and production parts for aerospace, medical, energy, and automotive applications.

Join a fast paced and rapidly growing team that works with the most advanced CAD/CAM software and high performance CNC machines. Work closely with engineers and technicians to develop high quality parts.

Responsibilities

- Program and operate 5-axis CNC Vertical Mills (Mikron w/ Heidenhain controls)
- Provide crucial input on design for machining, manufacturing, assembly, and low cost.

Requirements

- 5+ years of work experience with 3-axis CNC Vertical Mill programming
- 2+ years of experience with 5-axis CNC Mill programming
- MasterCAM, SurfCAM, GibbsCam, etc (Mastercam experience preferred)
- High speed machining and tool path optimization
- Ability to program and machine complex and close tolerance components
- Materials: stainless steel, steel, aluminum, plastics, Inconel, composite materials
- Strong work ethic
- Attention to detail
- Highly motivated
- Well organized and strong verbal communication skills
- Flexible, ability to work in a fast paced environment with tight deadlines
- Independent
- Microsoft Office, Word, and Excel a plus

Compensation and Benefits

- Generous compensation is based on experience; overtime is available depending on production needs
- Bonus system based on individual contribution and company performance
- Company provided a 401(k) profit sharing plan, with company match
- Company paid health insurance
