

Job Description

We are a full service, turnkey injection molding source located in Charlotte, North Carolina. From design and rapid prototyping to assembly and delivery, we can manage a complete parts program and work behind the scenes to ensure that the tightest of tolerances are met.

- Trouble-shoot processing problems
- Work in conjunction with the Quality department to improve process control
- Available to be Production Supervisor as needed
- Performing mold and/or material changes as dictated by the schedule
- Performing process troubleshooting, part inspections and various other functions to insure part conformity and quality
- Verifying paperwork for new start up jobs and oversee completion of 1st piece inspections
- Start-up of jobs as scheduled
- Monitoring and preparing support equipment i.e. thermolators, grinders, etc as needed in the production area

Job Type: Full-time

Salary: \$20.00 to \$26.00 /hour
